

Find More Gold – Deeper

The world's best coil for the world's best detector!

GPZ 19

GPZ 7000 19-inch Accessory Coil

- Deeper detection (average 30%*)
- More ground coverage
- Less ground noise
- Waterproof (to 3 ft/1m[†])
- Super-D coil technology

Super-D

ZVT

World's Best Metal Detection Technologies

MINELAB

"Working my way back up a creek, I found many ounces of weighty gold at incredible depths that had been totally ignored by a GPX with a 20-inch monoloop. I also missed these using the GPZ 14 coil – they were just too deep. The GPZ 19 is deceptively stable and quiet... I recovered a 15 ounce nugget, really deep!"

Jonathan Porter
Professional Gold Prospector, Australia

Find More Gold – Deeper and Faster!

The GPZ 19 Super-D coil has been designed by Minelab to maximize the performance of your GPZ 7000 and give a significant depth increase over the standard GPZ 14 coil.

Deeper Detection (average 30%*)

Larger coils typically detect deeper than smaller coils of the same configuration. Minelab field test results, in both low and high mineralized ground, using a range of natural gold nuggets, give an average 30%* detection depth increase when measuring performance of the extra large GPZ 19 coil compared to the standard GPZ 14 coil. With nugget sizes of 10g and below, the GPZ 7000 High Yield Gold Mode gave superior in-ground results. As the selected nugget size increased above 20g, switching into GPZ 7000 General Gold Mode provided an additional depth increase over High Yield.

*When compared to the average performance of the GPZ 7000 detector with GPZ 14 coil in typical environments. Actual performance depends upon prevailing conditions. | Refer to www.minelab.com or product carton for further details.

More Ground Coverage

The GPZ 19 coil (19" x 18") has 53% more area than the GPZ 14 coil (14" x 13"). It's perfect for wide open spaces and covers more ground in less time!

Less Ground Noise

Improved coil geometry gives less magnetic coupling between transmit and receive windings, resulting in reduced ground noise. Hear less noise and more gold!

Waterproof (to 1m/3ft†)

The GPZ 19 coil is waterproof and submersible to a depth of 1m/3ft. You can easily detect rivers, or detect in rainy or wet conditions.

Super-D Coil Technology

A Super-D coil consists of a central transmit winding and two outer receive windings. The GPZ 19 coil has isolated suspension windings that are less prone to mechanical vibration noise.

Coil Specification	
Size (approx.)	19" x 18" (480mm x 457mm)
Weight	4.03 lb (1.83 kg)
Compatible Detectors	GPZ 7000
Key Technologies	ZVT, Super-D (1 x Tx and 2 x Rx windings)
Waterproof	Waterproof to 3ft/1m (fully submersible)
Accessories	Replacement skidplate available
