## 2D ID MAP

### POWERFUL 2D ID MAP

With MANTICORE's Two-Dimensional (2D) Identification (ID) Map, you'll see targets from a new perspective. 100 Target ID range and additional ferrous indication helps you identify targets with precision.

### FAST RESPONSE

Find desired targets amongst ferrous trash like no other detector on the market with MANTICORE's exceptional target separation performance.

### ENHANCED DISCRIMINATION

Exceeding expectations with every swing, MANTICORE delivers improved Target ID stability and close target separation. With customisable Ferrous Limits you have unprecedented control to accept ferrous coins, reject complex ferrous targets, or dial in maximum target unmasking in iron.

### AUDIO YOUR WAY

Take control of audio with MANTICORE. Hear target information the way you like it with superior audio controls providing an unprecedented level of customisation. Choose from noise suppression with Enhanced Audio, lightning fast target separation with Depth Audio, and Prospecting Audio with a genuine threshold detection tone for maximum sensitivity to fine jewellery and small gold nuggets.

### ULTIMATE SEARCH MODES

MANTICORE delivers over 10 customisable Search Modes including All-Terrain optimised for inland detecting; Beach optimised for sand, surf and seawater zones; and Goldfield optimised for detecting gold nuggets.

### UNRIVALLED CONSTRUCTION & EXTREME WATERPROOFING

There's no reason to sacrifice comfort for power. MANTICORE weighs only 1.3 kg (2.9 lb) and features a 3-piece highly collapsible carbon-fibre shaft system with premium SCORPION Armrest. No terrain is off limits with MANTICORE - dive up to 5 m (16 ft) for underwater exploration (IP68 Rating) to find hidden targets others can't reach.

### BOOSTED EMI IMMUNITY

There may be a storm raging outside but inside MANTICORE it's quiet and calm. Improved EMI rejection means it's possible to operate using higher sensitivity whilst isolating target information - even in the most challenging environmental conditions.

### LIGHTING & VIBRATION

The daylight may have ended, but that doesn't mean your hunt has to. With Control Pod Flashlight, Display Backlight with Auto Adjust, and Backlit Keypad, plus Handgrip Vibration, you can power on long after the sun has gone.

## MULTI-IQ+

**MORE POWER.  
MORE DEPTH.  
MORE FINDS.**

POWERED BY **Multi-IQ+**  
High Power Simultaneous Multi-Frequency

**Why High Power Multi-IQ+?** Because MANTICORE with Multi-IQ+ is the most powerful, fastest, and most precise metal detector in Minelab's history. The heart of MANTICORE is its super-charged Simultaneous Multi-Frequency (MULTI-IQ+) engine. This feat of innovation generates an incredible 50% power increase over the best-selling detector series of all time: EQUINOX. When combined with advanced 2D Target Identification (ID) and rich audio options, the detectorist has every bit of vital information arriving at their eyes and ears. MANTICORE is an unrivalled detecting experience that pushes the boundaries of detecting to deliver more power, more depth, and more finds.
